Understanding the Overall Poll Bias Score – A perfect bias score as compared to the 2020 exit polls equals a 0 value. A positive score equals a Democratic bias. A negative score equals a Republican bias. The higher the value of the number, the worse the bias. I will adjust polls with this score in mind. Usually the adjustment is straightforward in that I can apply the proper party ID, gender ID, education ID to the party votes provided in the cross tabs. Sometimes pollsters hide the party ID, gender ID or education ID, but I have methods of inferring those. The calculators for inferring these party ID values can be found below. Regional bias usually can't be inferred, although if they provide how each region votes they can.

This poll did not pr ratios for men and took the average o in Pennsylvania an this poll. This is be ignoring such a gle transparency.

	College Degree or +	No College Degree
Assumed Gender ID (Experiment until result matches poll result)	40	60

This poll did not provide ratios for degree holders, so we used the average of the other Pennsylvania and national polls. This is better than such a glaring lack of transparency.
