POLL BIAS CACLULATOR

Understanding the Overall Poll Bias Score – A perfect bias score as compared to the 2020 exit polis equals a qualican bias. The higher the value of the number, the worse the bias. I will adjust polis with this score in mind. Usually the adjustment is straightforward in that I can solve some polises with the partyl D, gender ID or education ID, but I have methods of inferring those. The calculators for inferring these party ID values can be found below. Regional bias usually can't be inferred, although if they provide how each region votes they can.
