Freedom from biased polls

CNN, Arizona, 10/21-10/26

Poll Bias Score = 151 to Dems, severe bias, must adjust. To om any Dems/too few GOP, too many college and post-grad degrees, too few white ID/too many non-white ID, too many 18-49, groups favoring Harris. These are not offset by too few women/many men bias.

Understanding the Overall Poll Bias Score -- A perfect bias score as compared to the 2020 exit polls equals a 0 value. A positive score equals a Democratic bias. A negative score equals a Republican bias. The higher the value of the number, the worse the bias. I will adjust polls with this score in mind. Usually the adjustment is straightforward in that I can apply the proper party ID, gender ID, education ID to the party votes provided in the cross tabs. Sometimes pollsters hide the party ID, gender ID or education ID, but I have methods of inferring those. The calculators for inferring these party ID values can be found below. Regional bias usually can't be inferred, although if they provide how each region votes they can.
