Freedom from biased polls

AtlasIntel, National, 10/30-10/31

Poll Bias Score = -30 to GOP, insignificant bias. Too many college and post-grad degrees offset by too much white ID/too little non-white ID/ Included in my average.

POLL BIAS CALCULATOR

Understanding the Overall Poll Bias Score – A perfect bias score as compared to the 2020 exit polls equals a 0 value. A positive score equals a Democratic bias. A negative score equals a Republican bias. The higher the value of the number, the worse the bias. I will adjust polls with this score in mind. Usually the adjustment is straightforward in that I can apply the proper party ID, gender ID, education ID to the party votes provided in the cross tabs. Sometimes pollsters hide the party ID, gender ID or education ID, but I have methods of inferring those. The calculators for inferring these party ID values can be found below. Regional bias usually can't be inferred, although if they provide how each region votes they can.
