# Visit FreedomWindow.net Freedom from biased polls

Echelon Insights, Pennsylvania, 10/27-10/30
Poll Bias Score = -35, insignificant bias.
Too many GOP and too few college degrees, pro-Trump biases, offset by disproportionately pro-Harris age groups. Included in my average.

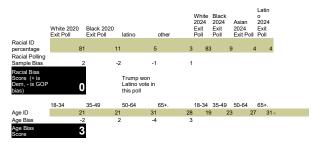

# POLL BIAS CACLULATOR

Understanding the Overall Poll Bias Score – A perfect bias score as compared to the 2000 exit polls equals a 0 value. A positive score equals a Democratic bias. A negative score equals a Republican bias. The higher the value of the number, the worse the bias. I will adjust polls with this score in mind. Usually the adjustment is straightforward in that lcan apply the proper party ID, gender ID, education ID to the party votes provided in the cross tabs. Sometimes pollsters hide the party ID, gender ID or education ID, but I have embods of inferring those. The calculations for inferring these party ID values can be found below. Regional bias usually can't be inferred, although if they provide how each region votes they can.

	Philly	Philly Sub	s NE	Central	We	est Phil	Philly ly Subs	NE	Central	West	
Regional Values (national polls only)		11	22	17	22	28	11	22	17	22	28
Regional Bias (National Polls Only)		0	0	0	0	0					
Regional Bias Score (+ is Dem, - is GOP bias)		<b>0</b> <sub>n/a</sub>
