Freedom from biased polls

Marist, Wisconsin, Late OCT
Poll Bias Score = 77 to Dems, definite bias, will adjust. Too many Dems, too few white ID, disproportionately pro-Harris age groups. Not offset by too few college degrees. Will adjust.

Understanding the Overall Poll Bias Score – A perfect bias score as compared to the 2020 exit polls equals a 0 value. A positive score equals a Democratic bias. A negative score equals a Republican bias. The higher the value of the number, the worse the bias. I will adjust polls with this score in mind. Usually the adjustment is straightforward in that I can apply the proper party ID, gender ID, education ID to the party votes provided in the cross tabs. Sometimes pollsters hide the party ID, gender ID or education ID, but I have methods of inferring those. The calculators for inferring these party ID values can be found below. Regional bias usually can't be inferred, although if they provide how each region votes they can.
