POLL BIAS CACLULATOR

Understanding the Overal Poll Bias Score – A perfect bias score as compared to the 2020 ext polis equals a 0 value. A positive score equals a Democratic bias. A negative score equals a Republican bias. The higher the value of the number, the worse the bias. I will adjust poils with this score in mind. Usually the adjustment is straightforward in that I can apply the proper party 10, gender 10, education ID to the party votes provided in the cross tabs. Sometimes polisters hide the party ID, gender ID or deducation ID, Dut I have methods of inferring those. The calculators for Inferring these party ID values can be found below. Regional bias usually can't be inferred, although if they provide how each region votes they can.
